Dr. James L. Green
Head, Space Science Data Operations Office
NASA Goddard Space Flight Center
Mailstop 630.0
Greenbelt, MD 20771

Dear Dr. Green,

I would like to take this opportunity to express my heartfelt thanks to you for Dr Kirk Borne's presentations at University of Maryland Eastern Shore. The University of Maryland Eastern Shore (UMES) is a historically Black 1890 Land Grant Institution. We are located on Maryland's Lower Eastern Shore and definitely benefit from the kind of scientific presentations Dr. Borne offered. More impressively he offered a Future of Data Mining Seminar for students and faculty followed by a luncheon presentation on NASA grants for the faculty. After lunch Dr. Borne did another outstanding presentation titled "Data Mining in Action" to our data mining class (CSDP 331).

Words can hardly convey the enthusiasm the student and faculty felt from getting these presentations from a well published professional. It is nice to know there are people like Dr. Borne and organizations like yours willing to reach out to the University of Maryland Eastern Shore students and faculty in this very concrete way.

On both a professional and a personal level, we really appreciated the hours that Dr. Borne was able to spend with UMES student and faculty. Again, thanks so much for his enthusiastic participation.

Sincerely,

Eddie Boyd Jr.

Dr. Eddie Boyd
